

National Assembly of Women

Even more women's state pension ages are going up under the ConDems!

- The outcry against their proposal to raise the state pension age, by TWO YEARS, for some women, led to some changes:
- Now the State Pension Age will be raised to 66 by October 2020, rather than April 2020 – but over 300,000 women will still have a delay of 18 months, and lose over £8000.

BUT

- The ConDems are proposing to raise the state pension age to 67 between 2026 and 2028, affecting millions of women and men now in their late forties and early fifties.

Increasing women's state pension age
